

Purchasing BYOD - iPad & Accessories via Winthrop Australia – Portal Page

Dear Year 3 Parents,

To access Winthrop Australia's portal page to purchase an iPad and accessories, please select the links below:

<https://sales.winaust.com.au/shop/burrendahps>

The school recommends that parents purchase the iPad (9th GEN) 10.2" Wi-Fi 64GB or 256GB (silver or space grey). Please note 64 GB is capable of storing sufficient data over time and running interconnected multimodal programs at the same time. Older versions with 32 GB or the iPad Mini are not considered adequate for school use. Devices with a SIM card or 3G/4G capabilities are not permitted as a security measure. However, these devices can be used, if the SIM card is removed whilst at school.

STM Dux Plus Duo iPad cover is considered essential to protect the device.

All other options/accessories are at your discretion.

If parents already have a second hand iPad, our guidelines state that it must be capable of running iPad OS – version 16.6. Note iPad 5th Gen is not suitable as they will not connect to school network via our wireless access points (WAPs).

Suitable iPads to run OS 16.6 are:

- iPad Pro (all models)
- iPad Air (3rd generation and later)
- iPad (6th generation and later)

For further information about iPad's compatibility with iPad OS 16, please refer to the following link:
